

IN THE SPECIFICATION

Please amend paragraph [0025] on page 7 of the specification as indicated below:

[0025] Referring to Figs. 5 and 8, a description of fuse holder 24 having neutral connection terminal 27 follows. Neutral connection terminal 27 includes a pair of neutral straps 150 disposed between two pairs of raised ribs 152 configured in base 54 defining a channel between each of the two pairs raised ribs 152 in which a neutral strap 150 is disposed. An angled block 154 is disposed intermediate straps 150 separating one pair of raised ribs 152 from the other pair of ribs 152. Block 154 is biased towards opening 30 by a spring 156 and is guided by ribs 152. One end of spring 156 depends from base 54 while another end of spring 156 depends from a bottom surface of block 154. Block 154 includes a conducting plate 158 positioned to provide electrical connection between neutral straps 150 when block 154 is moved towards opening 30. Each neutral strap 150 includes a protrusion 160 pointing downward towards conducting plate 158 to make the electrical connection between neutral straps 150 and plate 158.
